

# The Freedom Range New for 2007

## More flexibility. More freedom.

In 2006, Navman launched the Freedom F20, one of the top-selling car navigators in Europe. Building on that success, Navman introduce the new, expanded Freedom range. With four models to choose from, the 2007 Freedom range features brand new options normally found on more expensive car navigators.

### New Freedom Range features for 2007

Navman's unique **Bluetooth hands-free calling technology** can now be used with or without the navigation device. It also features voice recognition and caller ID and can be paired with up to 5 mobile phones.

Another first is Navman's combined **Traffic and Bluetooth** device, fitted in seconds and offering all the benefits of hands-free calling technology with subscription-free, real-time traffic information, in one simple to use unit.

## Freedom Range Models
