

MOBILE TRAVEL ASSIST

Ultimate Mobility

Navman Mobile Travel Assist S60 Edition

Navman introduces the ultimate 'Mobile Travel Assist'.

The easy to use Navman Mobile Travel Assist software puts pioneering GPS navigation capabilities on mobile phones with the Symbian operating system. Once automatically connected with a Navman **Bluetooth®** GPS receiver, the Travel Assist brings next-generation GPS navigation to mobile phones on a MMC/SD card.

Let us make life easier for you. Navigate to pictures with the unique NavPix technology – simply select an image that represents your destination and the Mobile Travel Assist software will automatically plan the best route for you.

Get ahead of traffic wherever you are with real-time traffic information provided by European automobile clubs sent directly to your mobile phone. Find out about interesting places in cities you've never been to before from travel specialist Wcities. Never again miss a flight with OAG flight information.

The Mobile Travel Assist from Navman.
Travelling the Easy Way.
