

N20

The NavPix™ Range

From the moment you pick up the new slim, lightweight N20, you know you're in safe hands. The N20 not only looks smart, it is smart.

With its built-in NavPix technology, you can simply download destination photos from the NavPix website and navigate to them just by tapping the screen. Navman's optional Traffic Pack is subscription free and clicks with the N20 in seconds and the 'Nearest Parking and Petrol' buttons mean the closest petrol station or car park is only a click away. And with the N20's very latest GPS technology, your position is fixed quickly, getting you up and running in no time at all.
